Dear clients and friends,

Re: Energy Myths and Realities by Vaclav Smil

In the spirit of the season please accept this book as a gift from Lewin Capital Management. Vaclav Smil is a Distinguished Professor of Environment and Environmental Geography who has published numerous books and articles on energy, the environment, food and the history of technical advances. I found this book on a recommended reading list from Bill Gates, and this fall I attended a presentation he gave for an American Physicists Conference in Vancouver.

This book provides a counterpoint to the prevailing wisdom on energy policy. The author's breadth of knowledge across many disciplines provides him with a unique perspective and his arguments are insightful and thought-provoking. I think this book is worth reading and I hope you enjoy it.

Best of the season to you and your family.

Sincerely,

Dan
